

AI that moves the world.

That's the power of Intel Inside®.

Rugged Edge and In-Vehicle AI Powered by Intel® Core™ Processors

Join SINTRONES to discover the future of rugged Edge AI, powered by our collaboration with Intel. We are showcasing two breakthrough platforms engineered for the harshest environments.

Experience the ABOX-5221, powered by 14th Gen Intel® Core™ processors. It features our patented ThermoSiphon™ cooling—a revolutionary pump-less innovation that enables unthrottled, fanless operation from -40°C to 70°C.

Also on display is the VBOX-3650, an In-Vehicle Edge AI Computer driven by the Intel® Core™ Ultra Series 3 processors. With a built-in NPU and rugged M12 connectivity, it delivers efficient, high-performance AI inference for next-gen fleet and railway safety. See how these Intel-powered solutions redefine reliability for mission-critical applications.
