Industrial Vision Solution

Supervising Machinery Assembly, Automating Processes, Optimizing Quality

In today's fast-paced manufacturing landscape, maintaining quality standards while ensuring efficiency is critical to maintain pace with evolving customer expectations and rising costs. Bravent's Industrial Vision solution offers a streamlined approach to quality control and monitoring, leveraging cutting-edge AI to automate inspection processes and optimize resources. Intuitive data visualization enables businesses to easily monitor production lines and detect anomalies or safety hazards in real-time or flag them before they occur. Leveraging the Intel® Geti™ platform and the Intel® Distribution of OpenVINO™ toolkit, Bravent can continuously develop and get new models to market faster to empower customers with the latest features. With the Industrial Vision solution businesses can not only automate and improve quality control, but also boost worker productivity and optimize costs.

Intel Products and Technologies
- Intel® Distribution of OpenVINO™ Toolkit Product Page
- Model Zoo for Intel® Architecture Product Page
- Intel® Atom Processor Product Page
- Intel® Core™ Processors Product Page
- The Intel® Geti™ Platform Product Page

Key Features

	Real-Time Data Analysis	Anomaly Detection	Speed & Automatic Learning	Quality Control Monitoring

Vertical: Manufacturing

Use Case:
- Asset & Operations Optimization
- Machine Condition Monitoring
- Product Inspection

Country/Geo: Global
