Touch Dynamic Quest VIII Ultra Tablet | Powered by Intel® Pentium® Processor N6415

The Touch Dynamic Quest VIII Ultra Tablet delivers a perfect balance of power, portability, and performance—built for demanding business environments in retail, hospitality, healthcare, and field service. At its core is the Intel® Pentium® Processor N6415, leveraging advanced 10nm architecture for efficiency and reliability. This processor delivers faster speeds, superior graphics, and improved energy management—ideal for applications requiring consistent uptime and responsive performance.

With Intel® UHD Graphics and support for up to 16GB RAM, the Quest VIII Ultra handles data-heavy tasks, digital menus, line-busting apps, and real-time communication with ease. Designed for durability and mobility, it's IP65-rated, drop-resistant, and equipped with a hot-swappable battery for uninterrupted productivity in fast-paced settings.

The Intel® Pentium® N Series boosts performance while enhancing longevity, security, and scalability for evolving business needs. Touch Dynamic combines cutting-edge Intel technology with rugged design and intuitive functionality. Empower your workforce with a tablet built for performance and endurance.
