

Expand Retail Beyond Limits

UniStop Tech — The Future of 24/7 Phygital Retail

Written by Unistop Team

Operate Smarter. Reach Further. Stay Secure.

UniStop Tech's AI-Powered Autonomous Retail Solution empowers retailers to run 24/7 autonomous operations, enter untapped markets, and deliver seamless phygital (physical + digital) experiences that connect online and offline retail.

Our fully enclosed stores combine robotic, intelligent automation, AI analytics, and smart connectivity, ensuring safe, efficient, and always-on operations anywhere, anytime.

Our Core Strengths

- **24/7 Autonomous Operation**
Always open, fully automated retail nodes providing continuous service without staff.
- **Fully Enclosed & Secure Design**
Fully enclosed, AI-driven architecture designed to enhance security, enabling reliable and autonomous operation even in public or remote environments.
- **Phygital & O2O Integration**
Seamlessly connect online and offline experiences by enabling customers to place orders through an app or website and pick them up instantly at nearby physical stores. This enhances convenience while driving increased foot traffic to retail locations.
- **Expand into Untapped Markets**
The compact, modular design allows for flexible deployment in transport hubs, residential areas, campuses, and remote towns, broadening market reach while keeping operational costs low.

- **AI-Driven Retail Optimization**

- Dynamic Pricing & Automated Promotion – Maximizes sales and profit in real time.
- Personalized Recommendation – Enhances engagement with AI-driven insights.
- Smart Inventory & Replenishment – Predictive analytics ensures top sellers stay stocked.

- **Compact, Reliable & Energy Efficient**

Integrated AI computing simplifies design, lowers energy use, and ensures consistent uptime.

Powered by Intel® Technologies

Enhanced by Intel® Core™ Ultra processors and the OpenVINO™ Toolkit, UniStop's AI engine achieves efficient edge computing, real-time vision, and high reliability — enabling intelligent retail experiences anywhere in the world.

Designed for Retailers' Future

- Enhance workforce efficiency and reduce operational expenses
- Extend geographic footprint to access more consumers
- Offer seamless online-to-offline shopping
- Deliver safe, secure, and intelligent 24-hour service

Experience the Future at NRF 2026

Discover how UniStop Tech and Intel are transforming retail through AI, robotics, and phygital innovation — creating the next generation of secure, efficient, and connected retail ecosystems.
