Unlocking the Power of On-Device AI:
Generate on Intel-Powered Asus
Zenbook

accelerated by intel.

On-device Al boosts security, efficiency, and automation

Generate by Iterate.ai, powered by Intel® Core™ Ultra processors, delivers secure, on-device AI for real-time insights, automation, and efficiency. Designed for industries like finance, retail, and healthcare, it enables private AI processing without cloud reliance, ensuring data security and compliance. With features like document search, summarization, and RAG, it streamlines workflows and enhances productivity. Optimized for Intel AI Boost (NPU) and integrated GPUs, it provides fast, scalable AI computing, reducing costs while improving performance.

Key Features

Automated Workflow Tools

ا Scalable Secure

Vertical:

Retail Education Financial Services

Horizontal Use Cases:

Consumer Commercial Productivity

Country/Geo: Worldwide

Generate is a private Al assistant that empowers organizations to harness Al securely on local infrastructure—eliminating internet exposure and cloud overage charges—while streamlining workflows with its integrated agentic card capability.
