

# Video Security and Analytics Powered by Intel® Core™ i3 CPU

## Spartan I

### Upgrade Existing or New Camera Systems With Private Edge AI

[Spartan I](#) is a privacy-first, on-premise Edge AI video analytics appliance designed to transform standard CCTV into an intelligent security system, without cloud dependencies or ongoing subscription costs. All video is processed locally on the device, ensuring complete data ownership, enterprise-grade privacy, and uninterrupted operation even during internet outages.

Powered by Intel-based Edge AI, Spartan I filters out irrelevant motion and delivers reliable detections for people, vehicles, and defined objects, reducing false alarms while improving response times. Customizable rules trigger instant alerts to mobile apps or monitoring centers, while integrated relays, audio, and lighting enables automated deterrence at the point of detection. The result is fully customizable real-time awareness, proactive prevention, and resilient security, entirely under your control.
