

Simplifying Content Management for Every Display

VigitSIGN

Retail, food & beverage, malls, and enterprises struggle to deliver consistent, engaging content across multiple locations. Static signage is costly and slow to update, while fragmented digital systems lack centralized control and performance visibility—leading to inefficiencies, inconsistent branding, and missed engagement opportunities.

Without real-time updates and analytics, businesses can't optimize campaigns or adapt quickly. Hardware management adds complexity, with downtime and maintenance costs from limited monitoring tools. VigitSIGN solves these challenges with a hybrid cloud-and-edge platform for centralized scheduling, dynamic content delivery, and proactive device management.

Cloud ensures easy updates and brand consistency, while edge provides resilience and fast local control. Built-in analytics and reporting deliver actionable insights for data-driven decisions and stronger ROI.

Key Intel-Enabled Features

Real-Time Analytics

Optimized Performance

Secure Content Control

AI-Powered Insights

- Boosts real-time content analysis and audience engagement.
- Processors deliver smooth, high-resolution digital display performance.
- Ensures secure, stable, and efficient system operations.
- Enables fast data handling for instant content updates.
