

Voice AI Without Boundaries

SoundHound Polaris Edge

Polaris Edge by SoundHound AI brings high-performance speech to text (STT) directly to retail, hospitality, and self-service endpoints. Optimized for Intel® Core™ Ultra Processors (Series 1) and optimized with OpenVINO™ Toolkit, the solution enables voice interactions to run locally on kiosks, drive-thrus, and embedded devices, reducing reliance on cloud connectivity while improving responsiveness and operational efficiency.

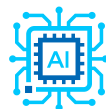

By leveraging Intel's integrated CPU and GPU architecture for edge AI inference, Polaris Edge helps organizations deliver fast, reliable voice experiences, enhance privacy through local processing, and support scalable deployments across distributed locations. The result is faster service, improved customer experiences, and a scalable voice AI foundation for modern retail and hospitality operations.

Key Intel-Enabled Features

Low-Latency
STT

Hybrid AI
Inference

Local Data
Privacy

Edge-Scale
Deployment

- [Intel® Core™ Ultra Processors \(Series 1\)](#) accelerate on-device STT using integrated CPU and GPU resources.
- [OpenVINO™ Toolkit](#) optimizes inference workloads to reduce latency and improve responsiveness.
- Local AI processing helps keep voice data on-device, supporting privacy-focused deployments.
- Efficient edge execution enables scalable deployment across kiosks, drive-thrus, and endpoints.

By leveraging Intel® technologies, Polaris Edge by SoundHound AI enables responsive voice interactions for kiosks and drive-thrus while reducing latency, cloud reliance, and privacy risks.
